

## COMMUNITY CHANCE

A heat wave sweeps through the region over the summer, resulting in the death of several of your cattle. Subtract 2 cash tokens if your farm contains a Silvopasture card.

## COMMUNITY CHANCE

Due to deforestation in the area, ecotourism moves toward areas with greater natural forests. Any player whose farm lacks a protected forest card must pay two cash tokens to any other player with one such area.

## COMMUNITY CHANCE

There is a concentrated community effort to reduce soil erosion in the wet season and community level efforts to implement soil health activities. As a result, more farmers begin adopting better soil health practices, teaching others to implement similar practices. Add 2 soil tokens.

## COMMUNITY CHANCE

A tropical storm has swept through the region, with high winds damaging farms and their crops. Agroforestry arrangements and farms with windbreaks suffer less damage. Subtract 2 cash tokens for each land use which is either Agriculture – Commercially Irrigated or Agriculture – Rainfed.

## COMMUNITY CHANCE

An NGO is organizing farmers in the area to purchase insurance in the event of the next hurricane. If you choose to pay for the insurance coverage, subtract 4 cash tokens now to in order to avoid the penalty from the next hurricane damage card.

## COMMUNITY CHANCE

Your local government has received payments for reducing deforestation. Depending on the carbon stored, farmers can receive payments for their land management. Any player with a Protected Forest land use may add 3 cash tokens for each card and 2 for each Agroforestry land use.

## COMMUNITY CHANCE

A government funded program provides training and materials for best techniques in measuring soil bulk density and implementing no-till agriculture. It will cost you two days of work to attend, but could benefit your farm in the long run. Any player who chooses to attend must pay 5 cash tokens in order to receive 7 soil tokens.
